FAX (202) 842-4285

Dear Bill:

This letter is an informational notice of the Postal Service's decision to terminate the Area Mail Processing (AMP) feasibility study at the Industry, California Processing and Distribution Center (P&DC).

On January 22, you were advised of the Postal Service's intent to conduct the study. The reason for the study was to determine whether consolidation of mail processing functions would help eliminate excess capacity and make more efficient use of facility space, staffing, equipment and transportation.

After careful review, it has been determined there are no significant opportunities to improve efficiency or service through consolidation of all Industry P&DC mail processing operations into another facility at this time.

Streamlining operations and improving efficiency across the board is a constant and ongoing process. The Postal Service will continue to evaluate our operations, networks and functions in order to uphold our public obligation of providing affordable, universal service while meeting the evolving needs of our customers.

If you have any questions regarding this notice, please contact Mary Hércules at (202) 268-4356.

Sincerely,

John W. Dockins
Manager
Contract Administration (APWU)
