

**Preliminary List of Work-Year Installation Size  
For the 2006-2010 Collective Bargaining Agreement  
Showing Offices of 100 or More Work-Years**

***The APWU has a limited time to challenge this list before it is finalized.***

*Local presidents who believe their installation is listed incorrectly should immediately contact Phil Tabbita,  
Manager of Negotiations Support, at 202-842-4273, or via e-mail to [ptabbita@apwu.org](mailto:ptabbita@apwu.org).*

This list is based on information provided by the USPS. It is organized alphabetically by state, with facilities within each state listed in alphabetical order as well.

How to read this list: The Anchorage (AK) Post Office shows 852 work-years and would therefore qualify as a “200 man-year” office. The Fairbanks Post Office shows 165 work-years and therefore would not qualify as a 200 man-year office; it does, however, meet the criteria of a 125 man-year office. Dothan (AL), which shows 107 work-years, qualifies as a 100 man-year office. Installations of less than 100 work-years are not shown.

Notes: Installations include mail processing facilities, customer service facilities, and other facilities/operations (such as AMC and VMF) as they existed in 1992. The finance number listed is only one of possibly several included in the work-hour count for an installation. Work-hours are computed by adding the total number of paid hours, including straight time, overtime, and all types of paid leave, holiday pay, etc. The total is divided by 2,080 to determine the number of work years.

| STATE | INSTALLATION CLUSTER NAME | Total Paid Hours | Work Years | Area Name | Performance Cluster Name | PFC No. | Finance Number |
