ASM
BADGE REPLACEMENT
COST

Dear Mr. Neill:

Re: H4C-NA-C 98

Recently, Jim Lingberg met with Mr. Rodney Stone of my staff to resolve the above-referenced case.

The issue in this case involves the charge to postal employees for lost or unreturned identification cards.

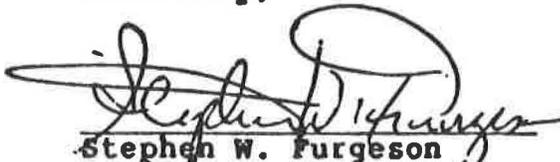

The parties agree to resolve this issue prior to arbitration based on the following:

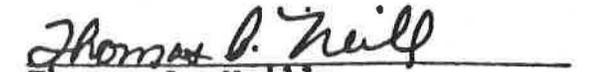

The proposed 1987 revision to the Administrative Support Manual, Section 273.272, changing the cost charged employees for lost or unreturned identifications from \$1 to \$5 was not published. The current charge as outlined in the most recent rewrite of the Administrative Support Manual (Issue 6, July 1989) of \$1 is the amount currently charged employees.

Based on the foregoing, it is agreed by the parties that the union will concurrently withdraw the arbitration appeal in this matter.

If the Postal Service revises these provisions at a later date, the Union will be notified in the customary fashion.

Sincerely,

Stephen W. Furgeson
General Manager
Grievance and Arbitration
Division

Thomas A. Neill
Industrial Relations Director
American Postal Workers

DATE 12/22/89

Enclosure

The following table shows the results of the experiments conducted on the 15th and 16th of May 1900. The first column gives the number of the experiment, the second column the number of the trial, the third column the number of the observation, the fourth column the number of the observation, the fifth column the number of the observation, the sixth column the number of the observation, the seventh column the number of the observation, the eighth column the number of the observation, the ninth column the number of the observation, the tenth column the number of the observation, the eleventh column the number of the observation, the twelfth column the number of the observation, the thirteenth column the number of the observation, the fourteenth column the number of the observation, the fifteenth column the number of the observation, the sixteenth column the number of the observation, the seventeenth column the number of the observation, the eighteenth column the number of the observation, the nineteenth column the number of the observation, the twentieth column the number of the observation, the twenty-first column the number of the observation, the twenty-second column the number of the observation, the twenty-third column the number of the observation, the twenty-fourth column the number of the observation, the twenty-fifth column the number of the observation, the twenty-sixth column the number of the observation, the twenty-seventh column the number of the observation, the twenty-eighth column the number of the observation, the twenty-ninth column the number of the observation, the thirtieth column the number of the observation, the thirty-first column the number of the observation, the thirty-second column the number of the observation, the thirty-third column the number of the observation, the thirty-fourth column the number of the observation, the thirty-fifth column the number of the observation, the thirty-sixth column the number of the observation, the thirty-seventh column the number of the observation, the thirty-eighth column the number of the observation, the thirty-ninth column the number of the observation, the fortieth column the number of the observation, the forty-first column the number of the observation, the forty-second column the number of the observation, the forty-third column the number of the observation, the forty-fourth column the number of the observation, the forty-fifth column the number of the observation, the forty-sixth column the number of the observation, the forty-seventh column the number of the observation, the forty-eighth column the number of the observation, the forty-ninth column the number of the observation, the fiftieth column the number of the observation, the fifty-first column the number of the observation, the fifty-second column the number of the observation, the fifty-third column the number of the observation, the fifty-fourth column the number of the observation, the fifty-fifth column the number of the observation, the fifty-sixth column the number of the observation, the fifty-seventh column the number of the observation, the fifty-eighth column the number of the observation, the fifty-ninth column the number of the observation, the sixtieth column the number of the observation, the sixty-first column the number of the observation, the sixty-second column the number of the observation, the sixty-third column the number of the observation, the sixty-fourth column the number of the observation, the sixty-fifth column the number of the observation, the sixty-sixth column the number of the observation, the sixty-seventh column the number of the observation, the sixty-eighth column the number of the observation, the sixty-ninth column the number of the observation, the seventieth column the number of the observation, the seventy-first column the number of the observation, the seventy-second column the number of the observation, the seventy-third column the number of the observation, the seventy-fourth column the number of the observation, the seventy-fifth column the number of the observation, the seventy-sixth column the number of the observation, the seventy-seventh column the number of the observation, the seventy-eighth column the number of the observation, the seventy-ninth column the number of the observation, the eightieth column the number of the observation, the eighty-first column the number of the observation, the eighty-second column the number of the observation, the eighty-third column the number of the observation, the eighty-fourth column the number of the observation, the eighty-fifth column the number of the observation, the eighty-sixth column the number of the observation, the eighty-seventh column the number of the observation, the eighty-eighth column the number of the observation, the eighty-ninth column the number of the observation, the ninetieth column the number of the observation, the ninety-first column the number of the observation, the ninety-second column the number of the observation, the ninety-third column the number of the observation, the ninety-fourth column the number of the observation, the ninety-fifth column the number of the observation, the ninety-sixth column the number of the observation, the ninety-seventh column the number of the observation, the ninety-eighth column the number of the observation, the ninety-ninth column the number of the observation, the hundredth column the number of the observation.
