

# maintenance management order

**SUBJECT:** Loaders & Unloaders Maintenance Criteria  
Amendment

**DATE:** October 26, 2001

**NO:** MMO-123-01

**TO:** All Maintenance Capable Offices

**FILE CODE:** Y

CLEA:MM01118AA

This bulletin amends the Loaders & Unloaders Maintenance MMOs to clarify the use of blown air (i.e., compressed air, vacuum exhaust, etc.) and vacuuming on the Loaders & Unloaders. Effective with the release of this bulletin, the use of blown air in the routine servicing of this equipment is eliminated.

As an alternative to blown air, appropriate methods utilizing a HEPA filtered vacuum and brushing must be considered and implemented.

A new item, "open equipment and inspect dust conditions", must be added to the checklist to allow technicians/mechanics to determine the requirement for dust removal. If this inspection identifies suspect or unusual dust or debris, a supervisor or manager must be consulted prior to proceeding with any further action on the equipment.

Bulletin Number	Equipment	Acronym
MMO-038-98	Container Unloaders	CONTU
MMO-039-98	Container Loader Package (CLP)	CONTL
MMO-136-98	Postal Pak Unloader "A" (PPUA)	CONTU
MMO-088-99	Postal Pak Unloader "B" (PPUB)	CONTU
MMO-093-99	Postal Pak Loader (PPL)	CONTL
