

## **APWU Media Advisory**

### **Community Organizing to Keep Local Public Mail Services**

Event will emphasize the impact and inconvenience to the public in terms of convenience and promptness of mail delivery.

Postal Workers, Community Activists, Faith Organizations, Political Leaders, and AFL-CIO members will inform the public of the Postal Service's plans to discard mail processing of first-class mail in our city, as well as other sites across the country, and degrade service standards.

Removing mail processing from \_\_\_\_\_ mail processing facility adversely affects our ability to have prompt efficient mail service. This impact includes more degrading of service standards, while still providing pre-sort corporations overnight delivery of first-class mail, and denying these same services to the public.

Our Coalition will inform the public about these devastating plans and what actions are needed in our fight against the mail processing closings and degrading service standards.
